

- small molecule metabolic process
- ATP metabolic process
- oxidoreductase activity
- glutamine family amino acid metabolic process
- aspartate family amino acid biosynthetic process
- nucleoside triphosphate biosynthetic process
- UDP-glucosyltransferase activity
- trehalose-phosphatase activity
- glutamate metabolic process
- anion:anion antiporter activity
- tryptophan metabolic process
- cytochrome complex assembly
- heme binding
- alcohol biosynthetic process
